

What's the Right Solution?

See three different manufacturing solutions put the pieces together

Join Us March 28, 2012
Holzma U.S.
Gastonia, NC

Want to get a jump on your competition?

The Holzma U.S. Manufacturing Solutions Seminar is a unique opportunity to see three distinct manufacturing concepts, each focused on meeting a different type of production requirement. Each incorporates its own set of cost-saving ideas to help meet the challenges of shorter lead times, greater customization needs, and shorter run quantities.

- **Custom work cell** for ultimate product flexibility
- **Mid-Range work cell** for production quantities
- **High Production work cell** for volume manufacturing

Presentations inform you about industry trends, new directions in software technology, the latest developments in functional hardware, and the role the tax code can play in helping you buy equipment.

Your success is our business.

Simple ideas lead to powerful results.

We guarantee you'll discover new ideas to significantly help your company be more competitive and profitable. See in action:

- A variety of software products including CutRite optimization software.
- Material handling that's simple, effective, and space saving.
- Parts tracking, utilizing the powerful iConnect software, improving parts flow and eliminating errors.
- Product labels incorporating RFID chips for tracking products through shipping and on to the job site.

Schedule

- 8:30 a.m. Welcome
